

Council's greenhouse gas emissions from Council operations, including streetlights, for financial years 2012/2013-2016/2017 (actual) and predicted emissions from 2017/2018-2019/2021

The above graph shows the actual greenhouse gas emissions and predicted emissions to 2020/2021 from implementation of the Carbon Neutrality Action Plan.

Key activities to date:

2013/2014-2015/2016	Public streetlight energy efficiency upgrades
2015/2016	Solar and energy efficiency at Council owned and operated buildings
2016/2017	Solar installed at Bayside City Council Centre, Beaumaris Library and Beaumaris Community Centre
2012/2013-2017/2018	Reduced size of fleet vehicles, reduced number of cars in fleet, Myki for public transport, staff 'EcoDriver' training program

Note: Inclusion of contractor greenhouse gas emissions from 2018/2019 is expected to add an estimated 3,800 tCO₂-e to Council's organisational greenhouse gas emissions.
