

GAY AND LESBIAN HEALTH VICTORIA

LGBTI Diversity in Aged Care FREE GLHV TRAINING

GLHV has received funding over two and half years to deliver LGBTI professional development training to staff in the aged and community care sector across Victoria. The training is part of a national initiative managed by the National LGBTI Health Alliance and funded by the Commonwealth Department of Social Services which involves the roll-out of such training across Australia.

The training, called LGBTI Diversity in Aged Care, aims to support the development of culturally appropriate services for older lesbian, gay, bisexual, transgender and intersex (LGBTI) people. The 5 hour training promotes greater awareness of the range of issues facing older LGBTI people, provides information about relevant policy and legal issues, and includes a focus on good practice and inclusive care for LGBTI clients/residents.

The training includes a mix of interactive activities, research presentations and small group work. GLHV trainers aim to provide a safe and non-judgemental environment for open discussion, and build on the aged care sector's long history of person-centred care.
